Attachments: 2021 Activity-Event Calendar Significant Products and Actions ORD 12-8-20 CSS.xlsx

Samantha:

See attached. I added one row to the table to reflect the expected delivery of the draft final TSCA Prioritization EPA Report. CTE Supports adding this product as a major product or action requiring IO decisions.

Jeff

Subject: Transition Request: Major Products or Actions Requiring IO Decisions

Hi Directors and NPDs,

The Biden Transition Team has asked for major products or actions coming out of ORD that will require IOAA decisions between Jan-June 2021. The full request is below. I pulled items from a similar exercise we did in October in the attached. I can't think of much else to add, but Jennifer wanted me to check with you all. Totally fine if you don't have additions, but if you do, could you please add it to the attached or send it to me in the body of an email?

If you could reply with any additions by COB tomorrow, I'd greatly appreciate it. (OSAPE, note that I added the SI Annual Reports - could you please make sure what I put in is accurate?)

-Sam

Full Transition Team Request:

- We are interested to learn what the major expected decision points will be between January 20, 2021 and June 1, 2021 for OAR, OW, ORD and OCSPP. We have heard about many individual issues during the briefings, but would benefit from seeing as a whole the flow of expected work products,

actions and the like that will make their way to the Programs' front offices for decision or sign-off. Could you please ask these four offices if they already have, or could very easily compile, a list of the expected most significant items needing front office decisions during this time period, including if the schedule is mandated by a court order or other mandatory legal authority?
